

Homework Assignment 3B2

(To be used following Lesson 7)

Name: _____ Date: _____

Johnny and his granddad planted some corn. Johnny went out to measure the corn after it had been planted for a week. It was four inches tall. The second week he measured it was seven inches tall, and the third week it was 10 inches tall. If the corn continues to grow at the same rate, how tall will it be at the end of seven weeks? Complete the table below.

Weeks corn is growing	1	2	3	4	5	6	7
Height of corn in inches	4	7					

Analyze the table.

What is happening to the corn each week?

How are the numbers in the top row changing?

How are the numbers in the bottom row changing?
